

# GEC Purchaser Commitment

## WHO IS COMMITTING?

Please check all that apply:

- I am making this commitment on behalf of my organization
- I am making this commitment on behalf of myself

## WHAT ARE YOU COMMITTING TO?

### 1. LEVERAGE MY PURCHASING POWER

Leverage my purchasing power to mitigate climate change and reduce e-waste by increasing my percentage of total IT spend towards sustainable and circular technology products and services.

The GEC Purchaser Commitment has set the following campaign milestones. We have also allowed for campaign participants to set their own milestones and still join the commitment.

The campaign milestones are set to achieve the following percentages of total annual IT spend towards sustainable and circular technology products & services in this timeframe:

- 25% by 2022
- 50% by 2030
- 100% by 2050

Some organizations have already surpassed the 25% mark, while others are striving to achieve it. You have the option to modify your commitment percentages to align with your organization's goals. What is truly important is that you commit to a target.

Please select one:

I commit to achieving the campaign milestones stated above.

I would like to make my own commitment and set my own milestones (if so, please state your commitment goals in the field below, e.g., "I commit to XX% by the year XXXX"):

## 2. INVEST IN PEOPLE

Invest in people by committing to professional development and hiring practices that support hiring and training diverse, qualified professionals who will fully understand and implement sustainable and circular procurement to achieve your commitments.

To support the expertise needed for organizations to meet their sustainable and circular procurement commitments, there is a need to invest in people. These investments include training, job creation, and economic equity.

Please check all that apply:

I commit to increasing sustainable and circularity training of existing staff in procurement, sourcing, logistics, and supply chain of sustainable IT products and services.

When hiring for relevant positions, I will include sustainability and circularity as a part of part of new job announcements.

I will actively diversify vendors that support procurement of sustainable IT products and services to include women, minorities, indigenous peoples and small/medium businesses.

### **3. INCREASE TRANSPARENCY**

Increase transparency by annually reporting your progress and sharing your commitment to inspire others to do the same.

Send a signal about the power of sustainable and circular procurement to mitigate climate change and reduce e-waste by transparently reporting against your commitments. By letting others know you've made a commitment, you will encourage others to make similar commitments, helping demonstrate the global impact purchasers have on sustainability.

Please check all that apply:

I will publicly report the percentage of our annual technology spend dedicated to sustainable and circular technology products and services.

I agree to include our company name and logo in campaign materials to encourage others to join the GEC Purchaser Commitment.

I agree to share campaign-related successes with GEC for the purpose of receiving recognition for our efforts, such as achievements made toward our commitments.
